Phyathai 2 Green Hospital

Phyathai 2 Green Hospital  is a 13-story hospital, taking care of patients with chronic diseases, offering a total of 500 beds. It is the only hospital in Thailand that has achieved the World Green Hospital Certification from the World Green Hospital Association. The hospital focuses on energy conservation, waste reduction, and environmental sustainability. It utilizes solar energy, reduces carbon emissions, and operates on a zero-waste system.

The hospital has implemented several green initiatives, including:

- Solar energy for energy supply
- Water recycling system
- Waste management system
- Energy-efficient lighting

The hospital's energy consumption is monitored and managed through an energy management system, which helps in identifying energy-saving opportunities.

The hospital has received recognition for its environmental practices, including the World Green Hospital Certification and the Green Building Certification.
